Detailed benefits of our energy savings agreement (ESA)

- When serviced regular, your unit(s) will run at peak efficiency which can lower your heating and cooling costs, and prevent untimely breakdowns.
- Under our ESA, our technician will service your unit(s) twice annually, once in the spring prior to the cooling season and again in the fall prior to the heating season.
- The agreement term is one year.
- You will also receive priority on our schedule (which can come in handy during our extreme temperatures), and a 15% discount on any non-warrant parts that we have to replace.
- Also, as an ESA customer, you never pay an overtime fee if you need out services after hours, holidays, or weekends.
- Humidifiers/Clean air effects and some other limited equipment can be covered at an additional fee.
- The standard rate to perform the same tasks offered in the agreement (considered a precision tune-up) will cost approximately \$250.00 for one service on one unit and does not include the other benefits offered with the ESA. During our tune-up we also replace your air filters with our high quality pleated filters.
- The Energy Savings Agreement really is the best way to get the most for your money.
